

Sea trout, 202mm, 106g, taken in the WRFT sweep net on 15th July 2009, at Boor Bay, Loch Ewe.

This fish has been aged as a 2 year-old smolt in its first summer at sea and was growing quickly. Reading 2.0+.

Only 2 *L. salmonis* lice were counted on this fish (0 small chalimus, 1 pre-adult and adult, 1 ovigerous female), but I can see three on the photo! Fish photo by Ben Rushbrooke.

Sweep netting supported by the Scottish Government via the Tripartite Working Group.
